PROJECTS

Twitter Clone Using MERN.

Description: A Home page that will display the latest tweet from the platform based on the people you are following and *Explore page* what will show the latest tweets from the platform based on what topics you've selected and Notifications page that will show you the latest interactions on your tweets, like new followers or tweets likes. Profile page where you can see a user's information, tweets and interact with him.

TODO App (CRUD)

Description: CRUD is a type of mechanism that allows you to create data, read data, edit it, and delete those data. In our case, we're gonna make a Todo app, so we will have 4 options to create tasks, read tasks, update tasks, or delete tasks.

Memomy Game.

Description: The Memory Game Project is all about demonstrating the HTML, CSS, and JavaScript. I build a complete browser-based card matching game (also known as Concentration).

Food Delivery Application Using FIGMA (UI/UX).

Description: My aim was to create a design that considers the full range of human diversity, with respect to ability, age, language and other forms of human difference. More importantly, I wanted a similar user experience for every user, regardless of their abilities

3D Mobile UI

Description: 3D graphics are rocketing on top of creative experiments. Integration of various 3D Graphics into mobile and web interfaces make the User interface more catch and attractive.

TECHNICAL SKILLS

- Data Structures and Algorithm.
- C, C++, Java.
- HTML,CSS,Javascript , ==React js== ,Node.js , MongoDB
- UI/UX Designing ==(FIGMA)==.

ADDITIONAL SKILLS

- Leadership .
- Team Management
- Confident
- Good in using internet resources
